Social Credit Convention

The Didsbury constituency Social Credit convention was held at Acme on Friday last with about 100 delegates present. Mrs. Guy Sunberg of Carstairs was in the chair.

The following officers were elected: President, R. P. Kirk, Three Hills.

1st Vice-President, H. F. Pryor, Three Hills.

2nd Vice-President, Howard Hammil, Carstairs.

Secretary - Treasurer, Arthur Wheeler, Acme.

Didsbury Zone directors: Messrs. Fred Moyle, Harvey Hoesgood and Hugh Roberts.

Mr. Fred Moyle was elected Didsbury delegate to the southern convention to be held in Calgary on April 4 and 5.

Mr. W. Aberhart addressed a mass meeting of about 1000 people in the evening, and overflow meetings had to be held in adjoining stores, the address being relayed from the main hall with loud-speakers.

Knox United Church Notes.

At the invitation of the official board of the Knox United Church Rev. J. R. Geeson M.A., B.D., of Irma will occupy the pulpit at the Knox United Church at Didsbury and Westcott on Sunday, March 31st. All members and adherents of the church please attend to hear and meet Mr. Geeson.

Sunday, March 31 the Sunday School will commence at 11 instead of 11:45 a.m.

Finds Olds Youth Shoots Mother

Mrs. Rose Edith McConnell died from a bullet fired from a rifle in the hands of her twelve-year-old son, Benjamin, according to the verdict of a jury inquiring into Mrs. McConnell's death on her husband's farm, 37 miles west of Olds, on Monday. Before calling Benjamin McConnell to the witness stand, Coroner Dr. C. C. Hartman explained that as the boy was to be given protection under the Canada Evidence Act, and was a minor, he would have to exclude all but police and the jury while the boy gave evidence. It took approximately twenty minutes for the boy, who was the last of nine witnesses, to give evidence. The jury returned after 35 minutes' deliberation.

The grief-stricken father, A. J. McConnell, told of trouble experienced recently with the boy. His son, he said, had stolen two guns from a neighbor, had run away, borrowed money from a business man in Olds, and used it to go to Calgary. He and his wife had both reprimanded the boy for his conduct.

Young McConnell is now lodged in the R.C.M.P. cells in Calgary, awaiting further action by the provincial attorney-general's department.

Fish and Game Meeting

The annual meeting of the Fish and Game Association will be held at the C.P.R. waiting room on Thursday, April 4th at 8 p.m.

As we go to press we learn of the death of Mr. H. D. Halliday of Crossfield, who passed away this (Thursday) morning.

Revision of Voters' List

In anticipation of the Annual Revision of the Federal List of Voters, instructions and Forms have been received by the Registrars. The attention of the public is drawn particularly to the following:

(1) In order to avoid inconvenience and save time and mileage for prospective Electors, application to be added to the List should be made during the month of April, which may save the necessity of attending Court of Revision at the Local Centre.

(2) Application for deletion of a name from the basic List, prepared during November last, may be made during the month of April only.

Necessary Forms will be supplied through the Office of the Registrar of Electors—A. Clark Bury, Olds.

Transferred to Calgary

Mr. H. C. Rennie and family leave today for Calgary, Mr. Rennie having been transferred. For the last 14 years he has been employed at the local telephone office in charge of installation and trouble-shooting. On account of the taking-over of the rural lines by mutual companies he has been transferred to the construction department at Calgary.

Both Mr. and Mrs. Rennie have been actively connected with the Evangelical Church, and on Friday evening the Albright Brotherhood and their wives gave them a farewell party and presented them with a gift as a token of appreciation.

On Tuesday evening the staff of the local telephone office tendered a farewell to Mr. and Mrs. Rennie and also presented them with a token of remembrance.

Didsbury Cattle to Calgary Sale

Several of the breeders of pure bred cattle have made entries in the Calgary Spring Show and Sale which will be held next week.

The following have made entries:

Shorthorns: H. W. Wait, Herefords: Hughes Brothers, C. E. Klink, Henry Klink, Didsbury; A. Robertson and Son, and A. M. Robertson, Westcott; W. G. Bellamy, Mrs. J. L. Bohannon, Mrs. P. W. Bohannon and W. Moore of Garfield.

PUBLIC NOTICE

In response to a petition signed by the required number of electors I hereby call a meeting of the electors of the Town of Didsbury to be held on Friday, the 5th day of April, A.D. 1935, at 8:30 p.m. in the Didsbury Opera House, for the purpose of discussing the matters referred to in the said petition.

WEDDINGS

STAUFFER-JACKSON

Immediately following the Annual Commencement Service of Mt. View Bible School, held in the M.B.C. Church on the evening of March 25, 1935, in the presence of a large congregation of relatives and friends was solemnized the marriage of Mr. Lester Stauffer of Didsbury, Alta. and Miss Opal Jackson of Galahad, Alta. The ceremony was performed by Rev. C. J. Hallman, Rev. Melvin Geiger of Galahad assisting. The bridegroom was supported by Mr. Ian Stauffer.

After Miss Solveig Haug had rendered a beautiful solo, Miss Eby began the wedding march. The procession consisted of Miss Pearl Jackson, sister of the bride, acting as maid of honor; five bridesmaids who also were the classmates of the bride, dressed in white crepe carrying lovely bouquets of yellow daffodils and ferns; the beautiful bride, dressed in white silk crepe, veil and orange blossom wreath carrying crimson and white carnations, leaning upon the arm of her father, who gave her away at the altar which was prettily decorated for the occasion. The ushers were Messrs. Lynn Hunsperger and Ray Shantz.

During the signing of the register, the solo, "Love Never Faileth" was touchingly rendered by Miss Sarah Zook.

After the ceremony, about 40 guests repaired to the home of the bride's parents, where amid many congratulations and best wishes a happy evening was spent. A buffet luncheon was enjoyed by all.

After the reception, Mr. and Mrs. Lester Stauffer left by car for points north on a short honeymoon, after which they will live on Mr. Stauffer's farm east of Didsbury. Our best wishes are extended to the happy couple.

WEEKLY SERMONETTE

"The Cross is God's answer to sin"

The Garnet Wheat Problem

The prospective carryover of Garnet wheat into the 1935-36 crop year has provided a problem which is causing the government of Canada some worry. On August 1st of this year Garnet wheat will be graded separately. Much of this grain has been bought on a 2 Northern basis and it is said it will have to be placed in 3 Northern after that date because of the new regulations. Between 40 and 50 million bushels of wheat with a large Garnet content is affected by the new ruling. This volume is in the hands of the grain companies who have asked the government to protect them against losses. It is estimated that such protection will entail the expenditure of around three million dollars.

NOTE: It has been intimated, since above was written, that separate grading of Garnet wheat may be postponed for another year in view of the situation outlined above.

Evangelical Church Notes

The Lenten meditation at the morning service Sunday will be "Golgotha's Hill." In the evening the Pastor will bring the message announced for last week, "Good News for Bad Times."

Don't forget the religious drama to be presented tonight (Thursday) by the Brotherhood and the young people.

BYRT-DAVIDSON

A quiet wedding took place in Calgary on Friday, March 15, when Dorothy Evelyn, youngest daughter of Mr. and Mrs. Wm. Davidson of Bergen, was united in marriage with George Albert, second son of Mr. and Mrs. Frank Byrt of Elkton.

What Are Actual Needs?

Listening to a discussion the other day on quotas and schedules adopted by governmental authorities as a guidance to those entrusted with the heavy and extremely difficult task of dealing with the cases of people who at this time are compelled to look to governments for the bare necessities of life, the question was forced upon our attention: What do we actually need?

There are an enormous and varied number of things we want, and our wants differ as greatly as our individualities differ, but when it comes down to a definite listing of the things we actually need not only to sustain life, but to make life really worth living, the number and variety of such needs is comparatively small.

People to-day list as needs scores of things which less than a generation ago were not even in existence, or so little known and in use as to be regarded as very great luxuries. For example, unemployed people living in our cities and, through no fault of their own compelled to accept municipal and government help, look upon the provision of electric light as an absolute necessity, and would consider it a great hardship if they were asked to resort to candles, or even the old kerosene lamp, as a means of illumination. Yet their parents got along very well with kerosene lamps and their grandparents and great-grandparents did not feel they suffered any great hardship because they had nothing but candlelight. And throughout the length and breadth of rural western Canada to-day hundreds of thousands of people get along very well with kerosene lamps. But in our cities people now list electric light as an absolute need.

Casting our memories back to boyhood days, thirty, forty, fifty years ago, we recall that our clothing and food requirements, our actual needs, were small and inexpensive compared with what we list as needs now. As a matter of fact, many of our so-called present day needs are not needs at all, and if our environment was shifted, we would not regard them as needs. Hundreds of people go camping every year, leave what we term "civilization" and go off into the wilds, and put up with conditions of living, and go without scores of things, and enjoy doing so, which at home they insist upon having as actual needs.

Life, and real living, does not consist in the abundance and variety of the material things we may possess. The pioneer lacked most of the things now listed as absolute necessities, yet they enjoyed good health, were happy, and found life well worth the living. They built homes, reared families of sturdy children, saw beauty in their surroundings, and developed character. Their needs were few and inexpensive. And they built nations.

These years of depression are developing two types of people. Out of one group men and women are emerging with stronger, finer characters. They are more self-reliant, with hampering superficialities burned away like so much dross, with the result that with the passing of the depression they will be the strong men and women who will take the leadership in this world, and who, out of the experiences of these years, will profit throughout the years to come. The other group consist of those who have been content to drift with the tide, to regard themselves as the sole victims of circumstance, ready to sit with folded hands and let others not merely provide them with actual needs, but who demand that these others shall further burden themselves in order that they may be supplied with things they want over and above their needs. With the passing of the depression, members of this second group will find themselves unequipped and incapable of making that provision for themselves which they will then be called upon to make.

It would be well, therefore, for all people to give serious consideration to what are needs and govern their demands upon their fellow citizens, as represented by the State, accordingly.

ALL FOOD MADE HER ILL

Caused By Acidity— Corrected by Kruschen

"It is only fair to pass these facts on," writes a nurse. "I was suffering from over-acidity and flatulence to such an extent that I was completely ill. I couldn't take food. When I actually forced myself to take something, I would be wretchedly ill. I have now taken Kruschen for 12 months, and I have no doubt that it has righted my digestive system. I am now quite fit and able to work with vigor again."—Nurse E. S.

Indigestion is caused by a failure in the flow of the gastric or digestive juices. As a result, your food, instead of being assimilated by your system, simply collects and ferments inside you, producing harmful acid poisons. The immediate effect of the six mineral salts in Kruschen is to promote the healthy flow of the vital juices of the body. As you continue with the "little daily dose," it ensures the regular and complete elimination of all waste matter every day. And that means a complete end to indigestion.

Figures show that fewer errors are made in night baseball than when the pastime is played in the day.

SKIN RASHES

Give Place to Velvet Smooth Skins

In almost countless numbers, skin sufferers have had cause to be thankful for D.D.D., the prescription of a highly successful physician, Dr. D. D. Dennis. This liquid prescription, now made and endorsed by Campana's Italian Balm chemists, allays irritation almost at once, and quickly clears up such skin troubles as eczema, hives, acne, ringworm, dandruff, pimples and rashes. Ask your druggist for D.D.D. Prescription. Trial size, 35c. Guaranteed to give instant relief or money refunded.

Signs All Can Read

Pictorial signs—a telegraph post for the telegraph office, a trunk for the baggage office, and a big question-mark for inquiries—are in use at Parkeston Quay, Harwich. All the symbols selected are known the world over, and foreign visitors of all nationalities can "read" them.

The Finnish statistical office reports that in the 13 main towns and cities of the republic 19,271 married women are engaged in remunerative activity; this is 18.9 per cent. of all married women there.

Seek Oil Independence

Germany Hoping Domestic Requirements Will Soon Be Met

Amazing was the resistance offered by the Germans during the war largely because of her scientists, and now the German people are seeking through scientific means to make their country as economically independent as possible. They are increasing their efforts to find substitutes for imports. Not the least of these is petroleum, or the mineral oil from which it is produced. It is now asserted by German scientists that within a few years Germany will be independent of mineral oil imports. Petroleum is being produced synthetically from coal, and success is attending efforts to utilize brown coal lignite so extensively found in Germany. In the last year Germany has produced a third of the petroleum needed and she hopes that by 1936 her total domestic requirements will be met.

Strange Happening

Radio Music Is Heard From The Spout Of A Kettle

Steam comes out of the spout of Miss Ruth Lightbourn's kettle at Oakville, Ont., but the utensil is also capable of producing other things. During a heavy fog, fine orchestra music came from the water container as it sat on the stove. The program, which was audible eight feet away, lasted 20 minutes, then faded. During a lighter fog the performance was repeated, but the music was fainter.

There is no radio in the house and the stove is in no way connected with a ground or aerial system. Miss Lightbourn is at a loss to explain the strange occurrences.

GARDENING

Gordon L. Smith

Spring is once more approaching and with it the desire in the normal human being to start something growing. Soon all signs of winter will have disappeared and the earth gradually change from its drab coat of brown to something green and warm. But before this change, the would-be gardener commences his annual preparations. Plans are drawn up, seed catalogues perused, and equipment is checked over. Much interest is added to gardening by proper planning and much practical value also. Like a great picture or a humble barn or garage, the finished result will largely depend upon the thought which precedes actual construction.

Width Vegetable Rows

Practically all vegetables should be grown in absolutely straight lines. Little things like lettuce, radish and carrots can go in rows from eight to twelve inches apart, while potatoes, peas and beans will need fifteen to eighteen inches and corn and tomatoes, sprawling cucumbers and melons from 18 to 24. To save space, rows of early and small stuff such as lettuce and spinach can be planted between corn and beets. Where this close planting is followed, it will be necessary to cultivate and fertilize frequently.

Flower Plans

In planning the flower garden, time of planting is important because some things must be started from seed indoors or in a hot bed. Certain flowers will stand a light frost and some will not. To have flowers from early summer until autumn, time of blooming must be taken into consideration, and heights should be noted down to prevent the tiny things from being hidden by such tall growers as Cosmos, African Marigolds and Stocks. Colors are important. Occasionally two shades do not go well together. Fragrance should be taken into consideration. Flowers like the sweet scented Evening Stock, while not particularly beautiful, have such a delightful odor, particularly in the early evening, that some of them should be included. Then again, flowers have individual preferences. Some like partial shade. Among these are tuberous rooted Begonias and annual Larkspurs, while the bright Nasturtiums, Portulaca and California Poppy revel in full sun and a dry location. With flowers, shrubs, roses, lawns and all forms of decorative gardening, informal planting is advised. Straight lines should be avoided and those already in existence, like house foundations and fences should be screened. Clumps of shrubbery and a few trees about a house will not only break these harsh lines, but will tend to tie the structure down to earth and produce a complete picture.

European scientists declare that rain falling in wooded land is 25 per cent. greater than that in open areas.

Use **ROYAL YEAST CAKES**
for a variety
of breads
like these...

Nourishing Graham Bread is always popular. Recipe on page 8 of Royal Yeast Bake Book.

New Process of Pre-Seeding Gives Promise of Doubling Yields Of Crops In Western Canada

Visions of being able to double the yield of Western Canada cereal crops under existing weather conditions, by pre-seeding treatment of the grain were outlined by James Wort, collegiate teacher and biology student at the University of Saskatchewan, when he spoke to the members of the Gladiolus Society.

The pre-seeding treatment, known as "vernalization," was first developed in Russia. Applied to limited experiments at the Saskatchewan University, it resulted in almost double the yield of cereal and green matter as the control samples grown under identical conditions, Mr. Wort stated.

Vernalization, otherwise known as "springification," was first conducted by a Russian experimenter who claimed for it the possibility of growing winter wheat by sowing it in the spring. The originator of the process said that it would also advance the date of maturity in spring wheats by 35 days.

The same experiments in the United States showed that the process did little to advance maturity of the grain.

These two conflicting views came to the attention of Mr. Wort some time ago and he determined to make a series of experiments at the university in Saskatoon. The experiments were conducted under field conditions and in the greenhouses where artificial light was used to speed up maturing the samples. In both cases almost double yields were noted in the treated sample over those not treated and grown under the same conditions. Mr. Wort found no advance in maturity time in his experiments.

The "vernalizing" process, as outlined by Mr. Wort, consisted of saturating the seeds by water and then placing them in a dark room where the temperature was maintained at from one to three degrees centigrade for several days.

During the time the seeds were kept in the cool, dark room, germinating process went on inside the seed, though no sprouts appeared. When the seed was placed in the soil it began to grow more rapidly.

Mr. Wort offered no explanation, as to why the yield was increased when the vernalization process was used.

A member of the audience said after hearing the address that a somewhat similar policy was used in ripening some flower seeds. He mentioned roses as an example.

Eskimos Know Secret

Dress Properly And Do Not Mind Arctic Winter

People in the Arctic suffer from cold no more and often less than Albertans because they have learned the secret of dressing suitably. Dr. J. A. Urquhart, federal government medico of Aklavik, told members of the Optimist club, Edmonton.

"When winter comes we know it's going to be cold and dress accordingly, but here people live in the hope a cold snap will end and are not so particular to wear proper winter clothing," he said.

Dr. Urquhart described the meticulous care the Eskimo women took to make warm clothing from caribou hides and sealskin. When a new parka was made the husband put it on and roughly jerked his shoulders. If the stitching did not hold perfectly he handed it back to his wife to make over because warm clothing meant life to him on a hunting trip, the doctor stated.

"When I want a new parka I pick an Eskimo my own weight and height and buy it right off his back. I don't take any chances in having one made for me," he related.

A bachelor is lucky in one way. When he gets a Christmas present he doesn't want, he doesn't have to pay for it.

Civilized man is the worst offender of all animals of the world in the matter of killing for sport.

W. N. U. 2087

Canadian Hay Supplies

Expect Keen Demand For Hay In Eastern Canada Before Spring

Owing to a short hay crop in Canada last year and to the lack of any substantial carry-over of hay from previous years, it was expected that the demand would be unusually strong until another crop was harvested.

The demand in September was really keen, in anticipation of general shortage, and stock yards and lumbering, mining and construction companies bought heavily with the result that prices advanced to comparatively high levels.

With this heavy buying many of the large corporations soon procured their season's requirement, sales dropped abruptly to only slightly more than normal and prices declined. Moreover, unexpectedly large quantities of hay have been released by the action of farmers in substituting straw, corn stalks and other roughage, as feed for their own stock in order to have more hay for sale, and added to this is the fact that in those sections of Nova Scotia and Ontario where it was earlier expected farmers would have to buy hay, the feeding season was shortened by the long open fall. Furthermore, the number of livestock was reduced, in areas of prospective feed shortage, by disposing of more of the inferior stock than is usual in times of plentiful supply.

In spite, however, of these various factors which have helped to conserve the supplies of hay it is the opinion of observers that by spring all of the marketable hay in eastern Canada will be required to supply the demand.

In the areas of shortage, both in Canada and the United States, hay supplies are being rapidly used up and it is expected that in these areas particularly there will soon be increased demand.

Idea Did Not Work

Farmer's Inspiration Spelled Disaster To Radiator Of Car

Farmer Dell Of Geneva, New York, had a great idea.

The more he thought of the idea, the better it seemed—to Farmer Dell. He confided in no one. He wanted to test it first.

The farmer's inspiration came from a peculiarity of Seneca Lake, one of the state's most famous beauty spots.

The lake very seldom freezes, despite the fact that surrounding waters are sheets of ice. Only in the most severe cold spells will the lake develop more than thin ice. There are various scientific explanations, including the great depth of the lake and its uniform year-round temperature. That didn't interest Farmer Dell. All he cared about was that the lake didn't freeze.

Farmer Dell's idea, as he later admitted, was to fill the radiator of his automobile with Lake Seneca water, and save the cost of purchasing non-freezing agents.

To his surprise, the water which would not freeze in Lake Seneca turned to ice so quickly during a zero cold wave that the radiator burst in several places.

To Have New Rifle

A new rifle for the annual shoot at Bisley will be provided for the next competitions, the Council of the National Rifle Association having decided to allow competitors for the King's Prize and other major competitions at Bisley in 1935 to use the pattern 0.14 rifle. This, when fitted with a telescopic sight, is the army sniping weapon, but telescopic sights will not be allowed in the "King's."

Bricks That Float

Spent shale, formerly regarded as waste material, is now being used in West Lothian for the making of bricks, which may be of any shape or color. The bricks can be so light that they float, so tractable that they can be cut with a saw more easily than timber, and yet strong enough for building purposes.

An Important Discovery

New Powder May Revolutionize Science Of Finger-Printing

Finger prints reproduced without a camera!

A new and powerful weapon is promised police for tracking down criminals by the invention of a new powder by Detective-Inspector Joseph Webber, of Taunton, Somerset, Eng. So successful have the initial series of tests been carried out, that it is being declared the powder may revolutionize fingerprint science.

The powder has been tested by government analysts, by Superintendent Battley, chief of Scotland Yard Finger-Print Department, and other authorities.

The authorities are hopeful that after final tests and improvements the powder will enable finger-prints to be taken from dark, or rough backgrounds. Little difficulty is encountered now with brilliant backgrounds.

The present system of taking finger-prints involves the smearing of a powder which brings up the subject and then it has to be photographed.

The new powder is smeared over the object where a trace of a fingerprint can be detected, and then a print of the subject can be taken without a photographic process.

A New Malady

Driving an auto in a faulty posture is responsible for a new malady reported by the British Medical Journal. It's "auto backache," which may be mistaken for lumbago, rheumatism or sciatica. "Auto backache" is caused by driving in an inefficient seat over a long period.

Oxford University Professor Is Interested In Unifying Standard Of Speech For British Empire

A Quality Market

Commodities Demanded By Scotland Are Always High Grade

A lot of fun has been had with the alleged penuriousness of Scotsmen, says the *Hanover, Ontario, Post*, but we still think they are one of the greatest races on earth. A recent report by a Canadian trade commissioner contains the following comment: "Scotland uses more Canadian flour than England, in proportion to population, not only on account of quality but because of the different methods of Scottish bakers." And then comes this significant sentence: "Of all the markets in the British Isles, that of Scotland is pre-eminently a quality one and this trait runs through the whole range of commodities." It's a lesson Canadians could well afford to learn; to place quality above price. Cheapness never made any country prosperous. Indeed, to buy cheaply forces cheapness throughout our economic life. Quality should be the main consideration—not price.

Although based on observations and calculations of astronomers, our calendar of to-day was devised before invention of the telescope.

Man is the only "cry baby" known in the animal kingdom, says one anthropologist.

One of the most amazing features of the British Empire is the variety of dialectic English speech the traveller may hear. England itself presents many different dialects. The Cockney, the Yorkshireman, the man of Devon—not overlooking the Oxonian—each has his own distinctive method of pronunciation, and he is quite indifferent as to how his neighbor handles the King's English.

In Scotland the traveller must be prepared for another style of speech, fairly familiar, however, around the world. Ireland has its North and South variations of "the brogue," and also boasts of its well-known Dublin accent. South Africa's English is diluted with a smattering of Dutch and Kaffir. The speech of the Australian man in the street is richly redolent of that heard in the neighborhood of Bow Bells; and even Canada must admit that she has a touch of the nasal twang familiar in the neighboring Republic, to say nothing of the delightfully original English heard in the Province of Quebec. To all this, and in all countries, must be added too-prevalent slovenliness of speech, and the day-by-day encroachments of slang.

Consequently he is a courageous man who, like C. Edgar Ford, Doctor of Music of Oxford University, essays to unify these dialects. Dr. Ford, at present in Canada, is, in his own words, "interested in setting one standard of speech for the Empire." He wants to break down those barriers which exist because of present dialects. Dr. Ford realizes the magnitude of such an undertaking, but approaches his task in a spirit of good humor. For example: "We in Britain, of course, have many different dialects, although they are tending to disappear. I once asked a girl (and this is a true story) as to why the Pied Piper was called Pied. She replied that it was because he was pied (paid) by the corporation to get rid of the rats."

The question of an international gold standard has no difficulties comparable to this standardizing of "English as she is spoke" in various parts of the Empire; but it is a job at which a man may work happily, and with certainty of many years of employment.—*Toronto Globe*.

Motor Car Production

Sixty Per Cent. Increase In Sales In 1934 Over Previous Year

Automobile production in Canada during the calendar year 1934 recorded an increase of 78 per cent. over 1933 and 92 per cent. over 1932. The output in 1934 totalled 116,890 motor cars; in 1933 it was 65,852 cars, and in 1932, 60,789. An encouraging factor was the gain in the number of cars made for sale in Canada, which advanced from 43,178 in 1933 to 72,481 in 1934, an increase of 68 per cent. Cars made for export gained 96 per cent. to 44,409 from 22,674.

Passenger cars accounted for 92.157 of the year's production, while the balance was made up of commercial cars and trucks. Fifteen companies were engaged in the manufacture of motor vehicles in Canada during the year, thirteen of which are located in Ontario, one in Quebec, and one in British Columbia. Production reached its highest peak during the month of May when 20,161 vehicles were produced.

New motor vehicle sales in Canada during 1934 increased by 60 per cent. in number and 63.8 per cent. in value over the preceding year. Retail sales of 72,513 vehicles with a value of \$74,471,280 were reported, and of this amount \$58,064,337, or over 79 per cent., represented cash transactions. New automobile sales during the year were financed to the extent of \$16,406,943. This reveals a very stable Canadian home market. Financing of all automobile sales, new and used, involved \$30,091,463 and covered a total of 75,170 vehicles.

Voice on the bus: "I'll tell you the type he is. If he settled on an abandoned farm it would still be an abandoned farm."

The SNAPSHOT GUILD

Don't Forget Snapshots at Night

A few inexpensive photoflood lamps are all you need for indoor pictures at night. Diagram (right) shows proper placing of lamps for picture (left). Diaphragm opening, f 6.3; shutter speed 1/25 of a second.

Although you may not be one of those lovers of the great outdoors and prefer the warmth of the old fireplace or furnace these cold, damp wintry evenings, there is no reason why you should not enjoy your camera, for it is always ready for action in or outdoors—an all-weather friend.

Time passes quickly and before we realize where the days and weeks have gone the air begins to get a little balmy and we are thinking of the garden, the yard or those pleasant drives in the car after dinner.

The next three months, however, are ideal for snapshots at night in the house and if you have not already experienced the pleasure of this fascinating pastime you have certainly missed a lot of fun and failed to "follow through" on your amateur photographic knowledge.

The "hey-hy-hi-de-ho" days of youth are the ones we always remember and as snapshots at night are so easy to take why not start in right now and make picture records of the many happy winter evenings at home. All you need are three or four photoflood lamps for brilliant illumination and a camera with an f.6.3 lens, or faster. Photoflood lamps cost only twenty-five cents each and as they are good for two hours of picture taking, the cost per picture is negligible. For the best results you should use the modern super sensitive panchromatic film. It is available in all standard sizes.

Let's suppose that Mary and you are entertaining Betty and Jack and everybody is as happy as the four some above seem to be. Let's make a snapshot at night of your party.

The diagram indicates the relative placing of the subject, lights and camera for this particular group. For a different setting you can place the lamps accordingly.

After you have located the group

in the finder and the camera is set, place an ordinary floor lamp, with the shade tilted upward, at position "A" as close to the subject as possible but out of the range of your finder. Lamp "A" should have sockets for three photoflood lamps. Two will do if you can have the lamp within three or four feet of your subject. (The light intensity increases as you place the lights closer to the subject and decreases when farther away.) Two photoflood lamps should be placed in lamp "B". Where shades on home lamps cannot be tipped for directing light on the subject, remove the shade. In such cases, some sort of reflector back of the lamps will throw more light forward. A white cardboard, a pillow case, or even a bright dishpan held directly behind the lights will help.

Set the diaphragm at f.6.3. If your camera is equipped with a self-timer, set the shutter speed at 1/25th of a second, turn on your photoflood lamps, take your position in the group and click it has made a snapshot at night for you.

If you have a box camera you had better use a photoflash lamp (not to be confused with photoflood lamps). Here's what you do. Place the floor lamp slightly back of and a little to the right or left of the camera. Remove the shade and screw the photoflash lamp into one of the sockets and be sure the current is "off." Assuming you have located the group, or subject, in the finder, open the shutter as you would for a time exposure and immediately turn on the photoflash lamp and after the flash of the lamp close the shutter at once.

Simple enough, isn't it?

The possibilities for indoor picture taking are endless and you are missing a lot of fun and fascinating pictures until you try it.

J. E. Gooder - Editor & Manager

Correspondence.

To the Editor:

O-o-o-ooh, teacher, them bad boys have been throwin' mud at me again. Yup, and I didn't do a thing to them either, nope!

Mr. Roberts, your letter was simply wonderful. Now if I could only write like that, why say, "could I but write a letter so, the blinkin' farmstead then could go; while high on stool with ink and quill, much better paying hours I'd fill." Yes indeed it sure was fine, though apparently you have gathered considerable unnecessary friction under the neck of your shirt. But while I highly commend your style of writing it is with deep regret that I am compelled to class your poetry as bum, crude, and altogether rotten. Nor could I scarcely I refrain from exclaiming, "Lay off, good brother poet, eschew that rotten verse; your poetry is on the blink, it couldn't be much worse."

Should Mr. Aberhart happen to see those lines you created in his honor I'm afraid he'd be inclined to get sore and see to it that you got swindled out of that long-promised twenty-five bucks. To my way of thinking the following order would answer the purpose far more effectively in bringing about desired results:

Oh for an hundred tongues to sing
And shout and yell like everything
To let him know we're still alive
And ready for that twenty-five.

We farmers are a sinful lot,
Nor surplus cash have any got;
So come across, dear Aberhart,
Before one healthy row we start.

—Nothing like a timely hint or two for speeding things up now and then.

Now, Mr. Roberts, there's just one little item I wish to contradict. You seem to be obsessed with the idea that I underestimate Mr. Aberhart's ability as a leader. Nay, nay, brother, not so. Any man who can teach school five days a week, preach the gospel on the sabbath, and in his spare time give dictation to a cockeyed world on how to eliminate graft, while he rakes in a few bucketsful of kale on the side, is no slouch. I would even go so far as to suggest that some of those horrid capitalists might do worse than borrow a few ideas from his stock.

Mr. Hahn's latest epistle was a complete disappointment. In fact so entirely lacking in practical common sense as to be totally unworthy of reply.

Well, boys, this really is too bad. Here we've been chewing the rag for more than a month and taking up valuable space in the Pioneer, with the result that both you fellows are still hopelessly in the wrong, while I, of course, am absolutely right. Then why continue the fight, why not bury deep the old tomahawk and makum one big pow-wow over grave? We might also join hands and tune our voices to the well-known refrain, "For He's a Jolly Good Fellow"—meaning, of course, the Honorable R.B.

LEW WRIGGLESWORTH

Correspondence.

To the Editor:

Someone remarked to me recently that your paper is getting really interesting. To anyone who is affected by the doings and the beings of his fellows the local paper which attempts to record them will always have interest, and may we hope that this same "interest" will contribute something to the credit side of your balance sheet.

In this mechanical age there are still some of us who have not got the radio. Even if we would, and have not, attended all the meetings, just a few at widely separated intervals, with opportunity to read and think in between, perhaps not as concentrated as desirable, but still sufficient to help us distinguish between what should be swallowed "holus-bolus" and what taken by degrees. So at this late date, in spite of assurances to the contrary, we fail to see the "philosopher's stone," long looked for, which was supposed to convert base metal into gold, or in other words, to give us something without contribution from ourselves.

When at school, in connection with theories advanced, there was a Latin quotation which was shortened to "Q.E.D." meaning "which was to be demonstrated," and another, "Q.E.F." meaning "which was to be done" and we still believe that there is a vast difference in the working out of each.

The speaker at one meeting seemed rather peeved when I suggested that the advice given by one many years ago to people he was interested in, "prove all things hold fast that which is good," was applicable to us in these discussions.

It is a great blessing that Spring is coming between now and when we try to record our decisions on these and other questions, so that we may have time to consider ourselves, for "vox populi" (the voice of the people) is not always "vox Dei" (the voice of God).

Yours truly

Week in the Legislature

By T. B. Windross

The routine of legislative business in the Alberta house was broken last week by the visit of Their Excellencies the Earl and Countess of Bessborough to the capital Friday. They were given an official welcome by both the provincial government and the municipality and spent the day in a round of formal engagements that kept them busy from the time they left their special cars at the C.N.R. depot until they left at night.

A public reception was accorded the distinguished visitors at the legislative buildings in the afternoon when addresses were presented from the province by Premier Reid, and the city of Edmonton by Mayor Clarke.

The galleries of the house were crowded with spectators and the seats on the floor were occupied by the members of the legislature and their friends. The affair was a colorful one, with flowers and foliage plants giving a gala effect to the chamber and the great rotunda of the buildings.

Following the addresses and replies by the Governor-General, the Countess of Bessborough and Lady Moyra Ponsonby were presented with bouquets of roses in a pretty ceremony in which the small daughter of Hon. J. R. Love, provincial treasurer, performed the task of presenting the flowers with a captivating sweetness of childish manner that won all hearts and a kiss from both the Earl and Countess.

This was the farewell visit of Their Excellencies to the west, as their term of office ends this year and they return to their home in England, and there was no doubt about the warmth of their welcome and the good wishes for the future expressed to them.

Wednesday the debate on the budget, which had shown signs of weakening for a day or two, came to an end and the house got down to the more serious business of the session by going into committee to consider supplies. The estimates of the Attorney-General's department and of the agricultural department were passed with comparative little discussion. The only incident of a seriously controversial nature arose when W. R. Howson, Liberal leader, moved that the salary of the Attorney-General be reduced to \$5,000 a year. The motion was rejected by the government. It was in line with Mr. Howson's criticism of the government's expenditures earlier in the session.

An amusing incident that had a more serious aspect at first, was introduced when A. M. Mitchell, Liberal, resented some severe criticisms of Mr. MacLachlan's, U.F.A. member for Pembina, in which he had said the opposition party was practicing "political thuggery of the worst kind." Mr. Mitchell declared that he would not take that from any man and challenged the Pembina member to repeat his charges "outside."

It sounded almost as if Mr. Mitchell was threatening hot little encounter against the Pembina member, but that was not the case, as he later explained. What he meant was that he wished the charges were made outside the house, where protection would not be enjoyed as it is in the house, from suitable reply.

There is as yet no indication as to whether Mr. W. Aberhart will accept the invitation of the government to appear before a committee of the house and explain his plan for Social Credit. He seems to be unwilling to meet the possible criticisms and arguments of the members and is reported to be taking advice from his followers as to what he should do.

In the meantime the government and all parties in the legislature are awaiting his decision with interest. It is felt that his explanation of his plan would help clear the air of any misunderstanding of it that may exist and would also put the members of the legislature in a better position to decide on any possible economic policy for the future.

Doubts are heard on all hands outside the legislative buildings as to the practical value of any Social Credit plan, unless it was one that

would be adopted by the other provinces. One argument is that Alberta cannot afford to isolate herself from the rest of the Dominion in a scheme of monetary reform that would not fit in with that in all other parts of the country. The opponents of Social Credit say only confusion more confounded could result from such a course. But on the other hand there are plenty of proponents of Social Credit who claim the position would be no different under Social Credit as regards the different provinces than it is as between different countries trading together with differing monetary systems.

Whatever the final result will be, Social Credit continues to hold a very prominent place in the consideration of politicians in all groups and parties at present, and the news of its increasing popularity is more or less disturbing in view of the coming elections in Alberta. All this makes the question of Mr. Aberhart's acceptance or refusal of the government's invitation one of great interest.

Burnside Notes.

The Prairie Ramblers of Calgary will supply the music for the dance in Lone Pine Hall this Friday evening, March 29th. There will be three cash prizes of \$15.00, \$10.00 and \$5.00 each given to the holders of the lucky tickets.

Mr. John Hunter of Sylvan Lake spent the weekend with his mother and other relatives at Neapolis.

A variety concert and dance will be held in Lone Pine Hall on Wednesday evening, April 3. A good program is promised and a Calgary orchestra will play for the dance. Admission 25c.

Mr. and Mrs. N. Eckel spent Monday evening with Mr. and Mrs. John Topley.

Mr. Cecil Cipperley had the misfortune to fall backwards in a truck on Friday evening and tore the muscles of his leg and foot very badly.

Mrs. Walter Fulkert and two sons who have been visiting her parents, Mr. and Mrs. Wm. McCulloch, returned home on Tuesday.

The W.L. held a very enjoyable whist drive at the home of Mr. and Mrs. Bert Pross on Saturday evening last. Miss Elma Olhauser won the ladies first and Mr. Frank Doyle of Munson the gents first while the consolations were won by Mrs. E. Hunter and Mr. Joe Hunter. The next whist drive will be held at the home of Mr. and Mrs. Harry Richardson on Friday eve. April 6.

Messrs. Bill Jenkins and Robert Davidson returned on Sunday from the Didsbury hospital much improved in health. Mr. Sam McAllister, still in the hospital, is reported to be improving.

Mrs. Joe Clarke spent Saturday with Mrs. Fred Thompson.

The road leading to Mr. Viney's home from the south west which has deep ruts from overtraffic should be graded.

Silver Wedding.

Mr. and Mrs. N. Eckel celebrated their silver wedding very quietly at their home last Saturday, March 23rd.

Mr. Eckel is one of the old-timers in this district, coming here in February, 1903, and taking up a homestead on what was then the bald prairie. He was born in North Dakota, but spent his boyhood at Walkerton, Ontario, where on March 23rd, 1910 he was married to Miss Ruth Richardson, only daughter of Mr. and Mrs. Robert Richardson of Walkerton.

Although their farm has grown to a section of land they still reside on the original quarter which was homesteaded so many years ago.

One son, Robert, who resides with his parents, helps to run the farm.

CARD OF THANKS

Mrs. E. G. Reitzel and family wish to take this means of thanking the many kind friends for the sympathy shown in their recent bereavement, and for the many beautiful floral tributes received.

NOW SORE THROAT EASED IN LESS THAN 3 MINUTES!

1. Crush and stir 3 Aspirin tablets in a third of a glass of water.

2. Gargle thoroughly—throw head way back, allowing a little to trickle down throat. Repeat—do not rinse mouth.

3. If you have signs of a head or chest cold take 2 Aspirin tablets—drink a full glass of water. Repeat in 2 hours.

Rawness, Irritation Go at Once Note Directions for New Instant Treatment

Incredible as it may seem, doctors are now prescribing a way that relieves raw, painful sore throat in as little as 2 to 3 minutes!

All you do is crush and stir 3 Aspirin tablets in $\frac{1}{4}$ glass of water and gargle with it twice.

Aspirin tablets disintegrate so completely no irritating particles are left. Results are immediate. At once soreness is eased—discomfort allayed.

Everywhere throat specialists urge this fundamental treatment instead of less effective old-time "washes" and "antiseptics." Remember this. And when you buy, see that you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer on every Aspirin tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM
THE HEART

WORLD HAPPENINGS BRIEFLY TOLD

T. W. Grieve of Montreal was elected president of the Canadian Produce Association at its annual meeting in Toronto in conjunction with the 23rd annual convention.

Rear-Admiral Richard E. Byrd, who arrived at Dunedin, N.Z., with his second Antarctic expedition, disclosed the expedition is \$50,000 in debt.

Toronto Centre presbytery of the United Church of Canada voted 51-20 in favor of ordination of women as ministers. The decision will be passed on to the general council of the United Church.

Canada's revenues for present fiscal year are running \$31,000,000 and \$32,000,000 ahead of last year. The Dominion's revenues are figured every day. They include customs, excise and income tax receipts, post office revenues, tax on gold and several minor sources.

Dr. H. A. Bruce, lieutenant-governor of Ontario, urged Toronto city council to start immediately on a slum clearance program. Dr. Bruce stated Canada was lagging behind the rest of the world in state-assisted housing and it was up to Toronto to give leadership to the rest of the Dominion.

Proves That Earth Wobbles

Stars Once Seen Now Do Not Rise
Above Horizon

When the astronomers of ancient Greece grouped the stars and found names for them they listed constellations that can now longer be seen from Greece. In this way they supplied Sir James Jeans, the British astronomer, with a proof of a scientific fact discovered long years after they departed this terrestrial planet. Among the constellations named by the men of Greece 2,500 years ago are some which, although visible then, cannot be seen in Greece to-day because they never rise above the horizon. The wobble, as it is called, is a movement of the spinning earth in which its axis makes a small circle once in every 26,000 years; in other words, each pole describes a circular path in the heavens at the speed of about a foot a year. This slow movement is caused by the pull of the sun and moon on the bulging equatorial part of our globe.

Little Journeys In Science

MATCHES

(By Gordon H. Guest, M.A.)

Perhaps the greatest discovery ever made by man was that of fire; and one of the most useful, if not the greatest, of inventions was that of producing fire by the use of matches. Friction matches containing the element phosphorus were first introduced by an Englishman, John Walker, about 1826. At the present time there are two general types of match in common use, namely the "strike-anywhere" and the "safety" match. The "strike-anywhere" variety is undoubtedly used the most and contains in the tip the following substances: potassium chlorate which is rich in oxygen; paraffin or sulphur; a binding material such as glue; a filling material such as ground glass, and a compound of phosphorus and sulphur known by chemists as phosphorus sesquisulphide. When the ordinary match is rubbed against a rough surface, enough heat is produced by friction to ignite the phosphorus. The heat produced by the burning of the phosphorus is increased by the burning of the potassium chlorate and carried to the wood by the slowly burning paraffin or sulphur. Other substances such as starch, clay, or plaster of Paris are often added to the match head to keep it dry or to regulate the speed of combustion.

In the "safety" match, red phosphorus, some substance which gives off oxygen readily, such as potassium chlorate, and some gritty material, such as powdered glass, are mixed with glue and placed on the side of the match box. The tip of this type of match contains potassium chlorate and an easily combustible substance, usually a compound of antimony and sulphur known to the scientist as antimony sulphide. The match cannot easily be ignited by friction except on the prepared surface on the box.

WHAT DOES YOUR HANDWRITING REVEAL?

(Editor's Note: Have you taken advantage of the author's offer to read your handwriting? It is an opportunity to know yourself better, and it may put you on the path to greater things. Read the offer following this article.)

It is not surprising that many of the letters I receive from readers of my articles ask whether there is any indication of talent. It is natural that people should be vitally interested in finding the best line of endeavour to follow, and any information that helps them to get the best out of their capitalization and make the utmost use of their latent possibilities is always welcome.

Handwriting does indicate talent, and this is not to be wondered at when we realize that handwriting is from the brain, and the brain is the source of individual power and capacity.

But the mere possession of a talent is by no means everything. We all know people who are talented in particular way, but who do not reach any heights of progress, who, in fact, are drifting along without ever doing anything really worth-while.

One case in particular comes to my mind of a man who has a rare talent for drawing. He can do things with a pen and pencil that I have rarely seen equalled by a person without any training along that line. Unfortunately, he happens to be blessed with more than enough of this world's goods, and is in a position where he does not have to work very hard for his money.

The result is that he has never gone to any trouble to bring out the best that is in him, and the world has lost a first-class artist.

This case will illustrate my meaning very aptly. I repeat that the mere possession of a talent does not imply that the talent will be used. There are certain essential characteristics that must be used in order that the talent can be brought into fruition.

The most important of these are Determination, Persistence and Will-power.

Many of my correspondents reveal latent potentialities, but they lack one or more of these other traits that are so vital to progress in anything that you take up.

There are a lot of people who have made real successes of themselves, without any hereditary or inborn talent, because they have had the will and determination to get somewhere. They have worked hard and made sacrifices in order that they might gain success.

And inversely, as I have shown, there are others with the really vital spark of inspiration lying within them who have failed because of an inability to drive themselves on.

Versatility is a good thing to have, but specialization more often leads to success. Make up your mind to follow a single line, and drive yourself forward with everything that you have along that single path.

Too many irons in the fire often means that none of them are properly attended to, and the result is failure.

Miss J. C. Regina—You are so versatile that it ceases to be an advantage, and becomes a positive menace to you. You can do so many things fairly well that the trouble is to find one thing to specialize on. But you must do this, if you really want to get anywhere. Take up your singing, and put your whole heart and soul into it. Obtain proper training, and make up your mind that you are going to succeed as a singer. That is the only way.

A handwriting analysis may open the door of opportunity to you. Find out what your writing shows, as well as that of your friends. Send specimens of the writing you wish to be analysed, stating birthdate in each case. Enclose 10c coin for each specimen, and send with 3c stamped addressed envelope to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. All letters are confidential, and replies will be forwarded as quickly as possible. Some delay is unavoidable owing to the large number of letters coming in.

Another Record Claimed

Man Keeps Motorcycle Engine Running For Eight Days

For 5,836 miles a motorcycle, with sidecar attached, travelled along ordinary roads in Australia without a moment's stoppage of the engine, and a world record is thus claimed by the man who rode the combination most of the time, Victor Barclay. He was relieved at intervals by two others but the engine was never allowed to stop at the change-overs. The ride took a little over eight days, the speed averaged being 30 m.p.h. The engine finally stopped owing to a defective plug.

Tribute From Chicago

Daily Paper Gives Unstinted Praise
To Winnipeg Figure Skaters

National pride was not hurt at the Daily News ice carnival when Canadian champions ran one-two in all the diamond-trophy events for men. No one minded these transient conquests, for spectators early had lost their hearts to an invading detachment of fourteen young men and young women from the Winnipeg Winter Club.

Singly, in pairs, in fours, in eights, their artistry, held enthralled one of the greatest groups of spectators ever assembled indoors. It was the most beautiful exhibition of figure skating Chicago has ever seen, and it won tributes which stadium crowds had reserved for presidential nominations.

Chicago long has liked and admired the homeland of these attractive invaders. Their triumph—and the graciousness with which they consented to skate in this benefit for poor children of the city—notably strengthen our ties of affection and respect for Canada and Canadians. — Chicago Daily News.

Open To Canadians

New York Magazine Is Conducting
Another Literary Contest

Any Canadian novelist who has not published a novel in book form is eligible for an attempt along with his cousinly colleagues to the south at winning \$10,000 offered by a New York magazine and publishing house.

This is the fourth competition of its sort, the first of which was won by Martha Ostenso of Winnipeg with "Wild Geese".

All manuscripts must be 50,000 words and must be in before Oct. 15, 1935.

Nearly 3,000 miles of canal are in use in England.

New Sun Reflector

Very Simple Device Has Been Invented In Germany

A simple device, consisting of a thin sheet of highly polished metal cut somewhat in the shape of a kidney, is a German invention designed to bring sunshine into every home. The reflector is especially useful for directing the health-giving rays of the sun to the face. It also can be used in treating other parts of the body where solar heat brings beneficial results. The polished sheet of metal is corrugated in such a way that its many flute-like ridges act as multiple reflectors which intensify the heat of the sun's rays.

A plant in Norway produces rust-free and acid-resisting steel, having an annual capacity of between 40,000 and 50,000 metric tons.

Doctors advise this natural corrective for Constipation!

Not a drug . . . safe, effective, economical!

Stop sour stomach, bad breath, headaches and all constipation ills. You can do it easily, cheaply with Quaker Bran.

Quaker Bran, the coating of the wheat, is milled so soft it cannot irritate. Yet it is effective. It works with nature to produce normal, healthy bowel movement . . . persuading the intestinal muscles to normal activity.

Remember, Quaker Bran is different from all prepared bran cereals. It is pure bran, uncooked—untreated—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

Serve it with your regular cereal each morning or in muffins, cookies, etc. There is a recipe book in every package.

QUAKER BRAN

Pure, Natural, packaged bran.

THE TENDERFOOT

By
GEORGE B. RODNEY
Author of "The Coronado Trail",
"The Canyon Trail", Etc.

CHAPTER XII.—Continued

"It's peyotl," he said sharply. "I know the damned stuff. Peyotl is the old Aztec name. All I know of it is that it is one hell of a kind of dope. After a little while it crazes the user . . . distorts his ideas of right and wrong, you know. If you found those half-smoked stubs by the camp fire, it's pretty clear that whoever was there was usin' peyotl cigarettes. It's against the law, of course."

"Do you happen to know whether old man Kane uses the stuff?"

"I'm damned sure he does not," said Jameson. "He gets bung-full on red-eye when he comes to town and he gets the Indians to make tizwin for him sometimes, but I'm sure he doesn't dope."

"Think Dustin uses it?"

"Not for a minute. Hardly any one uses it now. The Indians used to use it because they like to get all hopped up and it was too risky sellin' whisky to Indians. A federal offense, you know. It crazes 'em. I only know one fool about here who ever uses the stuff and that's Gregg out at the Broken Spur. They call him 'Peyotl' Gregg because of the way he gets full on it. He's a half-wit who's been workin' on the Broken Spur ever since Dustin and Goddard got it."

"Humph! If you're right, . . . then this man Gregg must have been at that camp in the hills. If Kane was there then this man Gregg may be able to tell us where we can find him. Tell me this, Jameson . . . What's the minin' law? Can a man, who locates an ore-vein, follow that vein when it leads into and under another man's land?"

"I'm pretty sure he can," said Jameson after a moment's thought. "That is . . . he can follow a vein that he finds off a man's land. He can't go on a man's land, pick up a vein and follow that. It's got to be done fairly. . . . Find a vein on his own land; trace it under some one else and follow it there unless the land owner beats him to it. See? Why?"

"Well, it sizes up this way to me. . . . Dustin and Kane have found

ore on the Hour-glass. Carr doesn't know about it. Dustin has bought up a note that Carr gave Pegram and Dustin will use that note to try to make Edith marry him to save her father. That note gives Dustin half ownership in the Hour-glass and will make Gerald Keene, who owns the other half of the Hour-glass, a partner of Sam Dustin and, if Dustin's plans work out, he will marry Edith Carr.

"Just what do you want?" demanded Jameson curtly. "First of all I want to find old man Kane. He's the key to the puzzle. He's got to tell us just what kind of a deal he's made with Dustin. He can tell us where and how he found that ore. And if it's on the Hour-glass, whether Dustin knew it was on the Hour-glass when it was located. He may be able to tell us if this man Dustin uses peyotl. If he does, he's probably not responsible for his actions."

"You're barkin' at a knot," said Jameson forcibly. "Sam Dustin is always responsible for his actions. Look here, Stone! What stake have you got in this. You're playin' too close to your lap for me. Come clean, old man."

"You know how the Hour-glass is owned, don't you?" asked Stone suddenly.

Jameson did not know and said so. "Joe Carr owns one half of it. Gerald Keene, the nephew of old Peter Vinton, owns the other half. If one of them dies the survivor gets all."

Jameson stood staring at him for a moment. Then he went to a closet and came back with bottle and glasses.

"You're tryin' to talk like a sane man," he said, "but your words just don't target. You don't know this man Dustin. By Carr's note, Sam Dustin practically owns Carr's half of the Hour-glass ranch. Keene owns the other half. A gold-mine has been found on the Hour-glass. Will Sam Dustin give half of the Hour-glass with its gold mine to a man he never saw? What deal will he make with this Gerald Keene? I'll tell you. In some way or other, in some damned dark, deep way that we couldn't think of, Gerald Keene will lose his share of the Hour-glass and Sam Dustin will own it."

"Talk your age," said Stone laughingly. "This man Dustin, that you all credit with superhuman powers, can't work miracles, I reckon. The main thing for me to do is . . . find this man Kane. He's the key to the whole damned mess."

"You're probably right"—Jameson nodded curtly—"but consider this. . . . In the camp near where that gold-ore was found you found those pieces of peyotl cigarettes. I don't believe anybody about here but that man Gregg ever smokes them. If our guess is right, then Peyotl Gregg was with the man who found or located that ore vein. . . . Probably old man Kane. The fact that Sam Dustin had that package in his coat pocket implicates him, of course. You can always get him under the narcotic law. He can explain it, of course. . . . But we don't need that now. Your best bet to find out exactly what has taken place is . . . question Peyotl Gregg or . . . find Dad Kane. . . . And for God's sake

GREASY POTS AND

Little Helps For This Week

"The beloved of the Lord shall dwell in safety by Him, and the Lord shall cover him all the day long." Deut. 33:12.

Whatever events betide,
Thy will they all perform;
Safe in Thy breast my head I
hide,
Nor fear the coming storm.

I have seemed to see a need of everything God gives me, and want nothing that He denies me. There is no affliction but either in it, or after it, I find that I could not be without it. Whether it be taken from me, or not given me, sooner or later God quiets me in Himself without it. I cast all my concerns on the Lord, and live securely on the care and wisdom of my heavenly Father. If my ways are in a sense hedged up with thorns and grow darker and darker daily yet I distrust not my God in the least, and live more quietly by faith than I would do if I possessed everything.

Meat packers report that more meat was consumed in the United States in 1934 than ever before in history.

Glasgow, Scotland, and the Isle of Man are to be connected by an air service.

HEADACHE, BACKACHE?

Mrs. J. W. Flanagan, 6 Labatt Ave., Toronto, Ont., says: "I had headaches, pains in my back, had no appetite, and would feel dizzy and faint. I was so weak I could hardly keep up. I took Dr. Pierce's Favorite Prescription and it seemed to give me new life."

tell his man Gerald Keene to watch his step when he gets here."

"What do you mean?" demanded the mystified Stone.

"You half-baked idiot! . . ." Jameson flung himself across the desk. "This man Gerald Keene represents one-half of the Hour-glass. Sam Dustin virtually owns the other half in the note that he holds from Joe Carr. Gold has been found on the Hour-glass and Dustin knows about it. Do you want to see Sam Dustin marry Edith Carr?"

There was no doubt in Duro Stone's answer to that question.

"All right! Then carry out your first plan. . . . Find Dad Kane! I'll start a still-hunt for him. In the meantime we might try a hand at Peyotl Gregg if we can find him."

With those words in his ears, Duro Stone took his departure.

CHAPTER XIII.

Spike Goddard watched Dustin ride up to the ranch-house of the Broken Spur and turn his horse over to one of the hands. With one glance at his partner Spike emitted a long, low whistle, went to the office, got out decanter and glasses and sat down to wait. Presently Dustin stormed up the steps, banged into the house and into the office, where he stood staring at his partner. Spike's very silence condemned him; also it acted on Dustin like salt on an open cut.

"What the hell ails you?" demanded Dustin curtly. "Anything happen to you?"

Spike shook his head. "Nothin' ever happens to me," he said. "I stay home and 'tend to my knittin' and nothin' ever happens to me. If I ever went traipsin' over the valley trailin' some red-headed girl who likes me just as much as a prairie-dog likes a ground-rattler, I might expect somethin' to happen to me but it never does. . . ."

The bottle whizzed past his head and broke in a score of fragments on the wall. He retrieved his glass that had escaped ruin and laughed.

"You go on an' answer your own question. What all happened to you?"

Dustin told him sketchily and Spike listened in evident disbelief. When that disbelief grew too great for words, Dustin turned on him in growing wrath.

"Listen here," he said. "I'm goin' to come clean with you, Spike. Then you'll understand what I'm after."

"I know," said Spike guardedly. "You're after that red-headed girl of Joe Carr's."

"Yes and by God, I'll get her, too. I went over to the Hour-glass to put it up to her, but she was out ridin' with that damned drug-store cowboy, wanderin' over the country. Six months from now she'll be my wife and she'll have her own kitchen to tend to. She'll be stayin' home then. . . ."

To Boost Capacity of Bell Refinery

**Additional Unit Will Double
Volume of Plant**

Immediate construction of additions to the Bell Refinery at Calgary, which will boost the capacity of the plant to 1500 barrels of crude oil daily, doubling the previous capacity, was announced by Floyd Huff, Refinery Manager recently.

Mr. Huff stated the storage capacity would be increased by a 175,000 gallon tank, making the total storage capacity 1,500,000 gallons, compared with 200,000 gallons when the refinery commenced operations three years ago.

Added equipment will include two new pipe stills, one of which is a semi-cracker designed for treatment of heavier grades of crude oil.

The Bell Refinery, Mr. Huff stated, is receiving deliveries from the Model, Spooner, Homestead, Mercury and Oil and Gas Products companies in Turner Valley.

Mr. Huff added that the enlargement of the refinery was due to a satisfactory increase in business during the past year.

GOPHER POISON!

NOTICE

The Municipality of Mountain View, No. 310, has arranged with the dealers in gopher poison at Olds, Didsbury and other points, to supply an equal amount of gopher poison to that paid for by the farmers of the Municipality, the arrangements to be in effect to the 1st day of June, 1935.

The Council requests that the farmers place their poison early.

A. BRUSO, Sec. Treas.
Municipality of Mountain View
No. 310

NOTICE

N.E. 14-34-2W, 5th Alberta.

Location: 1 1/2 miles from Didsbury, 1 1/2 miles from school. Soil: Black Loam 12" to 18" 130 acres under cultivation, 40 acres summer-fallow. Buildings: House 18 x 20 frame in good condition.

Horse Barn 18 x 20 with addition 6 x 12 log and frame, fair condition. Cow Barn 23 x 26 frame and log. Granary on skids 12 x 14 frame. 3 miles fencing 2 and 3 wires. Good water supply.

Terms of Sale—5% with tender, 10% on acceptance of tender, 10% within 60 days, without interest, and the balance in three equal instalments in 6, 12 and 18 months from the date of acceptance of tender, and such payments to bear interest at the rate of 7% per annum, or all cash at option of purchaser.

In all other respects the standing conditions of sale will apply.

Tenders must be accompanied by marked cheque for 5% of the amount of the offer which will be returned in event of non-acceptance. No tender necessarily accepted.

For further particulars apply to W. A. Austin, Barrister and Solicitor, Didsbury, Alberta.

Dated at Calgary this 8th day of March A. D. 1935.

V. R. Jones, Clerk of the Court.
Approved, H. W. Lunney, J.S.C.

Obituary.

EDWARD GIES REITZEL

Edward G. Reitzel passed away at his home in Didsbury, Friday, March 22nd, aged 69 years.

He is survived by his widow; one son, Walter, of Edmonton; three daughters, Mrs. E. H. Harris, of Edmonton, Mrs. A. G. Batt of Sheffield, England, and Mrs. A. Weber of Cereal, Alberta, also eight grandchildren.

The funeral services were held on Monday, March 25th from the Zion Evangelical Church, Rev. H. J. Wood officiating, and interment was made in the Didsbury cemetery. The pallbearers were Messrs. H. M. Reiber, W. G. Liesemer, J. V. Perscht, C. F. Rennie, E. Rieder and J. E. Liesemer. Many beautiful floral tributes testified to the esteem in which Mr. Reitzel was held by the community.

DIED

LAING—On March 24, 1935, Elizabeth, aged 51, beloved wife of Alex M. Laing, Gosforth, Northumberland, England and daughter of Jane Wrightson and the late Charles Wrightson, Didsbury.

Mountain View Notes

The next meeting of the Mountain View Social Credit Group will be held at the home of the president, Mr. Hughie Roberts, on Monday, April 1st. All interested in the movement are heartily invited to attend.

An unusually large meeting of the Mountain View Women's Institute was held at the home of Mrs. Ed Barnes on Thursday last, with Mrs. J. Hill presiding. The singing of O Canada commenced the afternoon session, followed by repetition of the Creed. Each member then handed in the block for a quilt, also the donations to a layette, after which the roll-call was answered by the telling of something about St. Patrick. The social convener had requested each member to donate 10 cents and relate how she earned same. Following the business session Mrs. Hosegood, constituency convener, spoke in her usual bright and cheery manner, this being followed by a short paper on "Home Economics" given by Mrs. J. Worrall. Mr. Ed Barnes delighted the members with a couple of violin selections, after which the meeting closed with the National Anthem. A delicious lunch was then served by the hostess and a social time enjoyed. The April meeting will be held at the home of Mrs. Garnet Tighe.

Things To Remember

Grand Dance at Lone Pine Hall this Friday evening Calgary orchestra. Big prize draw.

A Melville Anderson, optometrist and sight specialist, will make his regular visit to the Rosebud Hotel on Monday, April 1. Eyes examined and glasses fitted.
